Submissions FNC water strategy Submissions FNC water strategy

To whom it may concern .

I am strongly opposed to the Dunoon dam as there is a vast amount of well documented evidence that rainfall in this area is and will be sporadic and certainly not enough to warrant a dam . The loss of water due to leaks in the existing system is around %15 to %20 and this should be fixed first. The damage to the local wildlife in the area and the cost factors are way out of proportion, in regard to spending so much money on this project . We need much better water management and we need to recycle our waist waters and re use them.

Regards
