Q. Why are fish
so smart?
A. They live
in schools

GILLIE colour, pattern and thakala

*The Baaka is home
to the Golden Perch.
We are commonly
known as Yellowbelly.
Can you guess why?*

*Golden Perch
can grow up to
50 cms long
and weigh up
to 5 kgs.*

Baaka life like *GILLIE*

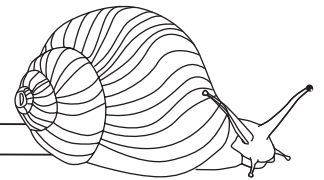

*Help these
river babies
follow the
adults.*

*Murray Cod are
the largest freshwater
fish in Australia. They
can grow up to
1.8 m long.*

*Olive Perchlets
only grow as long
as your finger and
are transparent.*

*Olive Perchlets
have big eyes
so they can feed
at night.*

*Darling River Snails
are hard to find. Their
cone-shaped shells
are only 1–2 cms long.
They don't have legs
but slide on a foot.*

*Silver Perch
can grow up to
40 cm long.*

Help *GILLIE* colour and count

*Hide and seek
is "o-fish-ally"
my favourite game!
Play by colouring
and counting my
catfish friends.*

Have you heard that the Baaka is home
to eel-tailed catfish?

These freshwater fish are native to the
Murray-Darling River and can grow up to
90 centimetres long. That's almost 1 metre!

How tall are you?

Eel-tailed catfish use small river stones
and gravel to build nests for their eggs.

**Eel-tailed catfish
nests can be up
to 2 metres
wide!**

**How many
eel-tailed catfish
are swimming
with Gillie?**

GILLIE'S a-maze-ing journey

Help Gillie
find his
friends

and don't
get lost on
the way!

This looks
turtle-y cool!

GILLIE Code breaker

*This page is
gill-ty of too
many fish puns!*

Use the
grid to help
Gillie crack
the code.

HINT
It's Gillie's
favourite
saying.
